

# M.Y. KARIMA SUPER YACHT VALVE REPAIR AND REPLACEMENT

Zero

safety or lost time incidents

**EnerMech delivered the valve repair and replacement on the M.Y. Karima super yacht, in a short timeframe where she was dry docked.**

**The M.Y. Karima super yacht was one of the first super yachts fitted with diesel-electric propulsion and a helicopter hangar. The yacht was docked in Cape Town for works.**

**Client:** M.Y. Karima

**Year:** 2017

**Product/Service:** Valve service and repair

## Scope of work

Testing and certification of the valves on board

The removal, service and repair and re-installation of four valves

The replacement and re-installation of 13 valves

## Project Delivery

EnerMech successfully delivered the valve repair and replacement of the valves on board the M.Y. Karima in the challenging timescale of just two weeks while she was dry-docked.

The project was completed with no safety or lost time incidents, and on budget. EnerMech secured additional piping work as a result of the client's satisfaction with the service they received on this project.

## Key Benefits

17 valves either repaired or replaced within dry-dock time

Project delivered safely, on time and on budget
