

# 3T ENERMECH GUYANA TRAINING CENTRE OF EXCELLENCE

In early 2022, a pioneering venture between 3t EnerMech, Orinduik Development and Windsor Technologies launched a training centre to deliver Guyana's first in-country, state-of-the-art training facility for the local workforce, supporting the development of the country's fast growing offshore oil and gas sector.

Established to empower and provide Guyanese with key skills and training certifications that are required to work in the offshore environment, the new facility combines expert instruction in-classroom training facilities, blended learning software and technology, as well as fully immersive simulators for high hazard activity learning.

The centre has gone from strength-to-strength, delivering training directly on behalf of the government to up-skill the people of Guyana with technical and competency skills to support roles across multiple sectors via the ECITB Guyana Online Academy of Learning (GOAL).
